### **DETAILED ACTION**

1. This office action is in response to amendment filed 02/01/2005.

#### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification, page 1, line 2, insert after "2002," -- now US Patent Number 6,747,460 B2, issued June 8, 2004 --

#### ***Allowable Subject Matter***

3. Claims 12-18 are allowed.

#### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims is the inclusion of a second device for measuring the material flow in a second spatial direction that is different from the first spatial

Art Unit: 2858

direction whereby said first device and said second device are separated from one another in a conveying direction of material flow.

As described in the specification (page 12) according to the invention, the different directions, relative to each other, of the electrical fields permit a more exact determination of foreign substances since with the one resonator housing foreign substances not detected can be detected with a high probability with the other resonator housing. In particular this refers to foreign substances having a geometric shape that is larger in one direction than in the other direction. Having different field directions relative to each other space means, in particular, that these fields are distinguished by different angles relative to the conveying direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
